Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 and 7, drawn to a cell growth-suppressing agent comprising a single-stranded RNA complementary to a transcript of WT1 gene.

Group II, claim(s) 4-6 and 8, drawn to a cell differentiation inducing agent or cell death-inducing agent comprising a double-stranded RNA complementary to a transcript of WT1 gene.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions of groups I-II are found to have no special technical feature that defines a contribution over the prior art of Sugiyama et al. (US 6,034,235, applicant's citation).

The first claimed invention in the instant case is a cell growth-suppressing agent comprising a single-stranded RNA complementary to a transcript of WT1 gene. Sugiyama et al. teach an antisense RNA oligonucleotide that is complementary to the RNA sequence of WT1, wherein the antisense RNA oligonucleotide is capable of binding to the RNA sequence of WT1 and inhibits growth of leukemia cells. See column 2, lines 11-65; column 8, lines 64-67; claims 1-8. Therefore, applicant's invention does not contribute a special technical feature when viewed

Art Unit: 1635

over the prior art of Sugiyama et al. Accordingly, the inventions of group I-II do not have a single inventive concept and so lack unity of invention, and therefore the restriction for examination purpose as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
